SAV-CON®
Connector Savers

The smart solution for preventing contact damage and extending service life

Glenair Sav-Con® connector savers are the smart solution for preventing contact damage and extending the service life of cable assemblies. Sav-Con® connector savers protect connectors that are mated and unmated frequently during manufacturing, test, check-out phases, and environmental test programs. They prevent costly repair or replacement by absorbing connect and disconnect abuse. Glenair Sav-Con® connector savers are available for all MS circular connector types, as well as for Glenair Mighty Mouse connectors, D-Subminiature and Micro-D connectors.

SAV-CON®

Connector Savers

The smart solution for preventing contact damage and extending the service life of cable assemblies and mounted receptacles

Sav-Con® connector savers protect connectors that are mated and unmated frequently during manufacturing, test, check-out phases, and environmental test programs. They prevent costly repair or replacement by absorbing connect and disconnect abuse. Glenair Sav-Con® connector savers are available for both standard and high-density insert arrangements. Popular Sav-Con® part numbers, especially for N (normal) polarization are in-stock and ready for immediate, same-day shipment. Glenair also manufactures and supplies Sav-Con® connector savers and bulkhead feed-thrus for a complete range of MS circular and rectangular connectors.

- **Traditional plug-receptacle savers, as well as in-line versions and gender changers**
- **Available EMI/EMP filter savers and adapters**
- **Pin/pin, pin/socket, and socket/socket versions**
- **Optional locking mechanism (recommended for bayonet-style connectors)**

Series changers and gender changers available in both Sav-Con® and bulkhead feed-thru configurations

Each Glenair Sav-Con® Connector Saver meets the military specification performance requirements of its mating connector. Glenair manufactures and supplies a Sav-Con® connector saver for most every military standard connector currently in use including:

- **MIL-DTL-26482 Series I and II**
- **MIL-DTL-28840**
- **MIL-DTL-38999 Series I, II and III**
- **MIL-DTL-83723 LN 29729 (SJT)**
- **PATT 105 and PATT 602**
- **Series 801 and 805 Mighty Mouse**
- **M24308 D-Subminiature**
- **MIL-DTL-83513 Micro-D Subminiature**
- **MIL-DTL-5015**
- **Series 28 HiPer-D® M24308 intermateable**
- **Series 89 Nano Miniature™ M32139**
- **Series 79 Micro-Crimp®**

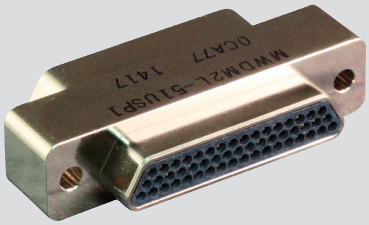
Comprehensive materials, plating, and polarization options available

Sav-Con® connector savers

For circular and rectangular connectors

Overview

A



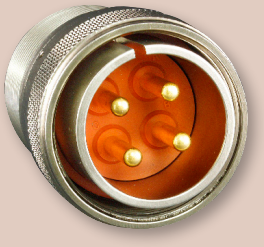
- For most every Military Standard connectors
- All standard materials and finish platings
- General duty, environmental, filter, hermetic and high-reliability performance classes
- Pin/pin, pin/socket, socket/socket versions, as well as gender changers
- Optional locking mechanism
- Keyed polarization

RoHS COMPLIANT

Sav-Con® Connector Savers are the smart solution for preventing contact damage and extending the service life of cable assemblies

Glenair Makes a Sav-Con® Connector Saver for Most Every Military Standard Connector Currently in Use

- MIL-DTL-26482 Series I and II
- MIL-DTL-28840
- MIL-DTL-38999 Series I, II and III
- MIL-DTL-83723
- LN 29729 (SJT)
- PATT 105 and PATT 602
- MIL-DTL-5015
- Series 801 and 805 Mighty Mouse
- M24308 Subminiature
- Series 28 HiPer-D®
- Series MWDM Micro-D Subminiature
- Series 89 Nano-Miniature™
- Series 79 Micro-Crimp®
- EMI/EMP Filter Circular and Rectangular



Mil-Spec Compliance

Each Glenair Sav-Con® Connector Saver series meets the same durability requirements as the Military Specification series with which it mates. The mating portions of the pin-and-socket contacts are in strict compliance with the applicable Military Specification contacts used in each connector series.

Circuit Probing

The closed-entry socket contact design permits probing for individual circuits during equipment test and check-out, preventing possible damage to the equipment connectors.

Standard Material and Finishes

- Shell, Barrel and Coupling Nut – 300-series stainless steel, titanium, aluminum
- Front and Rear Insulators – Glass reinforced thermoset plastic
- PC Receptacle Potting – High-performance potting material
- Finish – See material and finish table
- Contacts – PC tails, socket and pin crimp contacts – Copper alloy, gold plated
- Contact Retention Clip – Beryllium copper, heat-treated, unplated
- Retaining Ring – Ryton
- Wave Spring – CRES

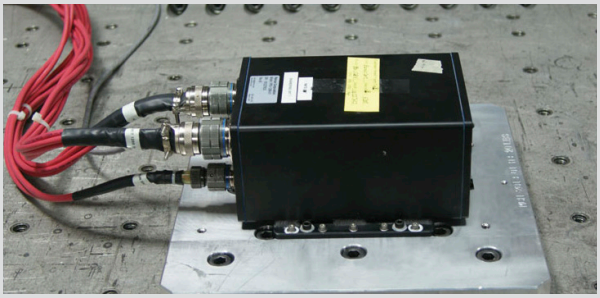
ZR	Aluminum	Zinc Nickel, Black	
ME	Aluminum	Electroless Nickel (RoHS)	

Sav-Con® connector savers
Circular military standard connectors
Performance selection guide

A

Sav-Con® Product Applications

Glenair Sav-Con® Connector Savers are designed to protect connectors that are subject to repeated mating and unmating cycles. Sav-Con® Connector Savers prevent costly repair or replacement of expensive connectors and cables while preserving the quality and integrity of connector performance. Sav-Con® Connector Savers take the abuse of repeated connection cycles instead of "black box" or other equipment connectors. Equipment connectors that are mated and unmated frequently during manufacturing, check-out phases and environmental test programs can be protected by Glenair Sav-Con® Connector Savers at considerable savings in time and money.



When a Sav-Con® Connector Saver is installed between a receptacle and a plug, the effective additional length is less than the length of an equivalent mated plug and receptacle. When using bayonet coupled Sav-Con® Connector Savers, Glenair recommends our Lock Ring design feature in applications where large cable bundles may induce unwanted stress to the coupling mechanism and potential unwanted contact displacement.

Choosing the right Sav-Con® Connector Saver for your application

All classes of Glenair Sav-Con® Connector Savers feature one-piece, non-removable pin/socket contacts for maximum reliability and minimum effect on circuit resistance. The mating portions of the pin-and-socket contacts are in strict compliance with the applicable Military Specification contacts used in each connector series. The one-piece design adds resistance to a circuit equal to a mated pin and socket contact, thus it has minimum or no effect on sensitive circuits.

All bayonet coupled Sav-Con® Connector Savers are available with an optional locking feature on the coupling nut. This feature eliminates the wave spring inside the coupling nut, thus providing positive metal-to-metal bottoming out of the plug side of the Sav-Con® Connector Saver to the mating receptacle. Improved durability can be provided by specifying the optional dry lubricant on the inside surfaces of the coupling nut.
Note: *Dry lubricant is not recommended for space applications due to outgassing requirements.*

Glenair Sav-Con® Connector Savers are available in one or more of the following service classes (see specific series page for details):

Class 0 - General Duty	Class 1 - Environmental	Class 2 - Hi-Rel
Glenair's basic Sav-Con® design is suitable for use in benign environments, such as manufacturing and bench test areas. Not recommended for use in environmental test programs, or in installations which will be exposed to non-ambient conditions.	This category offers peripheral and interfacial sealing to comply with mating connector environmental requirements.	High-performance versions of Class 1 configurations. This design employs materials to provide an extremely broad operating temperature range. Additional outgassing is also available via a modification code for use in space applications. Consult factory for appropriate modification code.

Optional Lock Ring prevents accidental disengagement of bayonet coupled connectors

The Coupling Nut:

This feature eliminates the wave spring inside the coupling nut, thus providing positive metal-to-metal bottoming out of the plug side of the Sav-Con® Connector Saver to the mating receptacle. This is a desirable option in the following applications:

Locking a Sav-Con® to a receptacle:

Locking a Sav-Con® Connector Saver to a receptacle can prevent accidental or unauthorized unmating. This can insure that the equipment receptacle remains in its unused condition prior to delivery.

Locking a Sav-Con® to reduce lateral forces:

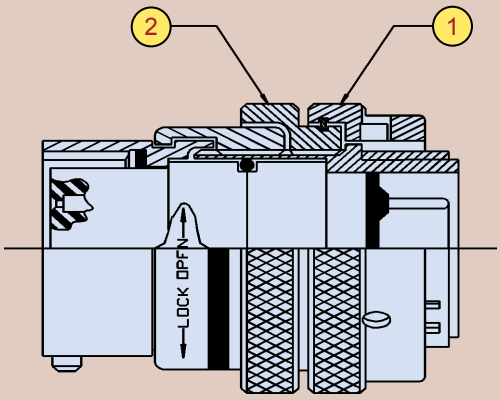
Lateral forces caused by a heavy cable can be reduced when the Sav-Con® Connector Saver is locked to the equipment receptacle. On high-density connectors that have a limited pin-and-socket engagement length, the force applied by a heavy cable can collapse the wave spring and create unwanted discontinuities in the mated contacts.

Locking a Sav-Con® when delivered to end-user:

When equipment is delivered to the end-user, the Sav-Con® Connector Saver may be locked to its mating receptacle to insure that the receptacles mounted on the equipment will remain unused until final installation of the equipment.

Locking a Sav-Con® to a cable mounted plug:

It is often desirable to lock a Sav-Con® Connector Saver on a cable-mounted plug coupler to prevent accidental disconnect of the Sav-Con®.



Locking a Sav-Con® Connector Saver to a receptacle can prevent accidental or unauthorized unmating. This can insure that the equipment receptacle remains in its unused condition prior to delivery.

1. To engage the plug portion of the saver, first ensure that the Lock Ring (2) is in the fully open position by turning the Lock Ring by hand clockwise until it stops.
2. Couple (1) to the Mating receptacle. Note: Pins should be visible in the three holes of the Coupling Ring (1).
3. To lock the Sav-con®, turn the Lock Ring (2) counter-clockwise by hand until it stops. This will seat the bayonet pins.
4. Dis-Engagement is the reverse of steps 3 and 2. Turn Lock Ring (2) to the open position clockwise by hand until it stops. Then rotate the Coupling Ring (1) counter-clockwise until all contacts are separated.

CATALOG NOTES

For all circular Sav-Con® connectors in this catalog:

- All parts will be identified with manufacturer's name and part number, space permitting.
- Glenair 600 series backshell assembly tools are recommended for assembly and installation.
- Dimensions are subject to change without notice. Metric dimensions appear in parentheses in diagrams and tables, based on 1 inch = 25.4 mm, for reference only. Unless otherwise specified, the following other dimensional tolerances apply:
  .xx = ± .03 (0.8) Lengths = ± .060 (1.52)
  .xxx = ± .015 (0.4) Angles = ± 5°

Customers are advised to consult the factory for the latest specifications, particularly to confirm critical dimensions such as connector lengths, threads, and so on. When errors or mistakes are brought to our attention, corrected content is posted immediately to www.glenair.com.

D-Subminiature Rectangular connectors
Series 28 HiPer-D® Specifications

Sav-Con® HiPer-D® Shell Plating Codes					
Shell Plating	**Glenair Plating Code**	**Salt Fog (Hours)**	**RoHS Compliant**	**Conductivity**	**Typical Applications**
Electroless Nickel	**ME**	96	RoHS COMPLIANT	Excellent	Space vehicles, missiles, avionics, unmanned vehicles, instrumentation. Corresponds to MIL-DTL-24308 Class K.
Nickel-PTFE	**MT**	500	RoHS COMPLIANT	Excellent	Harsh environment, soldier systems, communications equipment. Corresponds to MIL-DTL-24308 Code T.
Zinc-Nickel with Black Chromate	**ZR**	500	RoHS COMPLIANT	Good	Harsh environment, soldier systems. Corresponds to MIL-DTL-24308 Code K.
Cadmium with Olive-Drab Chromate	**NF**	500	No	Excellent	Harsh environment, military equipment.
Cadmium with Yellow Chromate	**JF**	500	No	Excellent	General purpose military equipment. Comparable to MIL-DTL-24308 Code F.
Black Anodize	**C**	336	RoHS COMPLIANT	Non-Conductive	Applications where EMI shielding is not required.
Gold	**Z2**	48	RoHS COMPLIANT	Excellent	Space. Corresponds to M24308 Class M.
Chem Film	**E**	48	No	Excellent	Avionics
Stainless Steel, Electroless Nickel	**ZM**	500	RoHS COMPLIANT	Excellent	Extreme environments where stainless steel is preferred for strength, corrosion resistance,and where high conductivity is desired.
Stainless Steel, Passivated	**Z1**	500	RoHS COMPLIANT	Good	Extreme environments where stainless steel is preferred for strength, corrosion resistance. Corresponds to MIL-DTL-24308 Class P.

Sav-Con® HiPer-D® Specification		
Description	**Material**	**Finish**
Contacts	Copper Alloy	Gold (50 microin.) over nickel
Socket Contact Hood (Size 20, 22)	Stainless steel	Passivated
Shell	Aluminum Alloy or stainless steel	See ordering information
Insulators	Ultem 2300	None
Interfacial Seal	Fluorosilicone	None
Grommet	Fluorosilicone	None
EMI Spring	Copper alloy	Electroless nickel
Contact retention clips	Copper alloy	None
Insert retention clip	Copper alloy	None
Adhesive/Sealant	RTV silicone	None
Hardware	Stainless steel (300 series)	Passivated
O-ring	Fluorosilicone	None

Micro-D Specifications

Sav-Con® Micro-D Plating Codes: ROHS Compliance			
Micro-D Plating Code	**Plating Type**	**RoHS Compliance**	**Notes**
1, A	Cadmium with yellow chromate conversion coating over electroless nickel	No	Electroless nickel is the preferred alternate.
2, B	Electroless nickel	RoHS COMPLIANT	First choice for RoHS compliance. Good corrosion resistance, excellent conductivity, M83513 approved, always in stock.
3, F	Stainless steel shell, passivated	RoHS COMPLIANT	Higher cost but unsurpassed corrosion resistance, not conductive enough for typical EMI needs. Build-to-order.
4, D	Black anodize over aluminum	RoHS COMPLIANT	Economical, non-reflective, non-conductive. Build-to-order.
5, E	Gold over aluminum	RoHS COMPLIANT	Low volume, higher cost, excellent conductivity. Build-to-order.
6, C	Chem film	No	Electroless nickel is the preferred alternate.
33, T	Nickel-PTFE	RoHS COMPLIANT	Glenair's 500 Hour Grey™ meets the need for a cadmium replacement with excellent conductivity, wear resistance and corrosion protection, M83513 approved.

Sav-Con® MIcro-D Material Specification	
Component	**Material and finish**
Connector Shell	Aluminum Alloy 6061 or Stainless Steel, 300 Series, Passivated. See Ordering Information for Aluminum Plating Options.
Insulator	Liquid Crystal Polymer (LCP)
Seals	Fluorosilicone Rubber, Blue
Pin Contact	Beryllium Copper With 50 Microinches Gold over Nickel Plating
Socket Contact	Copper Alloy With 50 Microinches Gold Over Nickel Plating
Hardware	300 Series Stainless Steel
PCB Terminals	Gold-Plated Copper Alloy, Solder Dipped
Capacitors	Planar Ceramic Array
Inductors	Ferrite
EMI Ground Spring	Beryllium Copper, Gold Plated
Encapsulant	Thermally Conductive Epoxy

Sav-Con® Micro-D Performance Summary	
Current Rating	3 AMP
Dielectric Withstanding Voltage	250 VDC
Working Voltage	100 VDC
Insulation Resistance	5000 Megohms Minimum
Contact Resistance	8 Milliohms Maximum
Low Level Contact Resistance	32 Milliohms Maximum
Magnetic Permeability	2 µ Maximum
Operating Temperature	-55° C. to +125° C.
Shock	50 g.
Vibration	20 g.
Mating Force	(10 Ounces) X (# of Contacts)

A

Sav-Con® Nano-Miniature™ Plating Codes: ROHS Compliance			
Nano Plating Code	Plating Type	RoHS Compliance	Notes
A1	Cadmium with yellow chromate conversion coating over electroless nickel	No	Electroless nickel is the preferred alternate.
A2	Electroless nickel	RoHS COMPLIANT	First choice for RoHS compliance. Good corrosion resistance, excellent conductivity, M32139 approved, always in stock.
S	Stainless steel shell, passivated	RoHS COMPLIANT	Higher cost but unsurpassed corrosion resistance, not conductive enough for typical EMI needs. Build-to-order.
T	Titanium, unplated	RoHS COMPLIANT	Higher cost but unsurpassed corrosion resistance, not conductive enough for typical EMI needs. Build-to-order.

Sav-Con® Series 89 Nano-Mianiture™ Material Specification	
Connector Shell	Aluminum Alloy, Electroless Nickel Plated Per SAE-AMS-C-26074, Class 3 or 4, Grade B
Socket Insulator	Liquid Crystal Polymer (LCP), per MIL-M-24519 or ASTM D5138
Plug Insulator	Liquid crystal polyer (LCP) per MIL-M-24519 or ASTM D5138
Potting material	Dexterhysol epoxy
Plug contact	Gold alloy per AST B477 and ASTM B541
Socket Contact	Gold alloy, unplated, per ASTM B477 or ASTM B541.
Wire	30 AWG gold plated copper alloy
Hardware	300 Series Stainless Steel
Encapsulant	Epoxy

Sav-Con® Series 89 Nano-Mianiture™ Performance Summary	
Contact Spacing	.025" (0.64) Contact Centers
Wire Accommodation	#30-#32 AWG
Current Rating	1 AMP Maximum
Voltage Rating (DWV)	250 VAC RMS Sea Level, 100 VAC RMS 70,000 Feet
Insulation Resistance	5000 Megohms Minimum
Operating Temperature	-55° C. to +125° C.
Optional High Operating Temperature	Mod Code 428 rated up to 400° C.
Contact Resistance	71 Millivolt Drop Maximum, 1 AMP Current, #30 AWG Wire
Vibration	20 g's, in Accordance with EIA-364-28, Condition IV
Shock	100 g's, in Accordance with EIA-364-27, Condition G
Durability	200 Mating Cycles
Corrosion Resistance	48 Hours Salt Spray In Accordance With EIA-364-26, Condition B
Humidity	96 Hours, In Accordance with EIA-364-31 Condition A
Contact Engaging/Separation Force	5 Ounce Maximum, 0.4 Ounce Minimum
Thermal Vacuum Outgassing	Total Mass Loss (TML) 1.0% Max., Volatile Condensible Material (VCM) 0.1% Max.

Sav-Con® Series 79 Micro-Crimp® Material Specification	
Size #23 contacts	Beryllium copper alloy, plated gold over nickel
Size #16 and #12 contacts	Copper alloy
Insulators	Liquid crystal polymer, 30% glass-reinforced
Shell	Aluminum alloy. See ordering info for finish options
Interfacial seal and grommet	Fluorosilicone
Contact and insert retention clips	Beryllium copper, heat-treated, unplated
Jackposts and guide pins	Stainless steel, passivated
Spring, EMI (plug)	Stainless steel or beryllium copper alloy, gold plated

Sav-Con® Series 79 Micro-Crimp® Performance Summary	
Current rating	Contact size #23 5 Amps, size #16 13 Amps, size #12 23 Amps maximum
Voltage rating (DWV)	Contact size #23 500 VAC rms. Size #16 and #12 1800 VAC rms. Sea level.
Insulation resistance	5000 megohms minimum
Operating temperature	-65° C. to +150° C.
Contact resistance	5 milliohms maximum
Water ingress protection	IP67 (Mated condition)
Shielding effectiveness	>75 dB attenuation from 100 MHz to 1000MHz, >60dB 1GHz to 4GHz, >40dB 4GHz to 10GHz.

CIRCULAR CONNECTORS

SAV-CON®

Circular Connector Savers

High reliability connector savers for mission-critical applications

Glenair Sav-Con® Connector Savers are designed to protect the quality and integrity of connectors that are mated and unmated frequently during manufacturing, test, check-out phases or environmental test programs. Available in general duty, environmental, and high-reliability performance classes with keyed polarization and optional locking mechanisms for bayonet style connectors, Glenair offers Sav-Con® Connector Savers for most all MS cylindrical connector series—many in-stock and available for immediate, same-day shipment.

Selection Guide

STANDARD OR FILTERED SAV-CON® CONNECTORS FOR MILITARY AND COMMERCIAL CYLINDRICAL CONNECTORS

Glenair standard and filtered Sav-Con® Connector Savers are available in a wide range of military standard configurations including MIL-DTL-26482 Series I and II; MIL-DTL-28840; MIL-DTL-38999 Series I, II and III; MIL-DTL-837323 Series I and III, threaded and bayonet connector savers; LN 29729 (SJT); PATT 105-PATT 602; and MIL-DTL-5015. Each Glenair Sav-Con® connector saver meets the same durability requirements as the military specification series with which it mates.

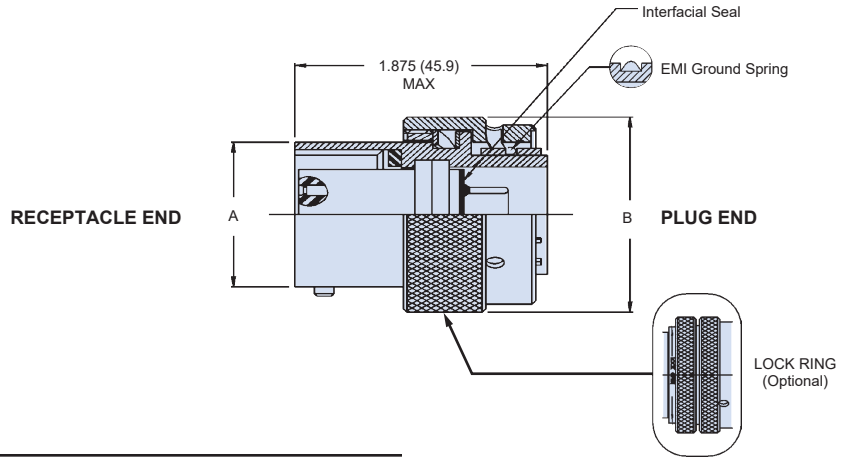
941-003 and 942-003 Bayonet Coupling

941-003 ENVIRONMENTAL AND 942-003 HIGH RELIABILITY WITH BAYONET COUPLING

How To Order									
Sample Part Number	**941**	**-**	**003**	**M**	**15-35**	**P**	**N**	**S**	**N**
Series	**94**								
Lock Ring (optional)	**L** = Lock Ring **–** (dash) = Standard								
Basic Number	**003**								
Finish	See Reference Information, Table I								
Shell Size - Insert Arrangement	See Reference Information, Table II								
Contact Type	**P** = Pins, Plug Side **S** = Sockets, Plug Side								
Alternate Key Position	**A**, **B**, **C**, **D**, **N** = Normal; See Table III								
Mod Code	**131** = Dry Lube (Omit for None)								
Alternate Polarization	A, B, C, D, N = normal, U = Universal (optional, omit for normal) See Reference Information, Table III								

*Add Modification Code 131 for dry lubricant on inside surfaces of the coupling nut. May not be suitable for space applications.

Dimensions		
Shell Size	A Max	B Max
09	.573 (14.6)	.910 (23.1)
11	.701 (17.8)	1.035 (26.3)
13	.851 (21.6)	1.210 (30.7)
15	.976 (24.8)	1.330 (33.8)
17	1.101 (28.0)	1.455 (37.0)
19	1.208 (30.7)	1.570 (39.9)
21	1.333 (33.9)	1.695 (43.1)
23	1.458 (37.0)	1.800 (45.7)
25	1.583 (40.2)	1.925 (48.9)



NOTES

1. For pin/pin and skt/skt, symmetrical layout only. Consult factory for available insert arrangements
2. Power to a given contact on one end will result in power to contact directly opposite, regardless of identification letter
3. Insert arrangement is in accordance with MIL-STD-1560. Shown for reference only.
4. Electrical safety limits must be established by user. Peak voltage switching surge, transient, etc. should be used to determine the safety application
5. If same polarization and opposite gender is desired, contact style and polarization for receptacle side my be omitted
6. Alternate polarization 'U' us anon-standard mil-spec option which allsows for mating to any QPL manufacturer's MIL-DTL38999, Series I connector having the same shell size insert arrangement, and mating contact size. Universal connectors are intended for use in testing facilities only and should be highly evaluated before consideration in another environment.

NOTES

1. Glenair's 233-213 connector savers are designed to meet or exceed the mechanical dimensional, electrical, and environmentsl, requirements of MIL-DTL-38999, D38999/20, D38999/26, and MIL-STD-1560 except as shown and /or noted.
2. Glenair connector savers mate with any QPL manufacturer's MIL-DTL-38999, series III plugs and receptacles that have the same shell size, insert arrangement, and polarization.
3. For pin/pin and socket/socket, symmetrical insert layouts only.
4. Power to a given contact on one end will result in power to a contact directly opposite, regardless of identification letter.
5. Electrical safety limits must be established by user. Peak voltage, switching surge, transient, etc. should be used to determine the safety application.
6. Alternate polarization 'U' (universal) is a non-standard/non-mill-spec option intened for test lab use only which allows for mating to any QPL manufacturer's MIL-DTL-38999, series III connector having the same shell size, insert arrangement, and mating contact size.

Sav-Con® connector savers
MIL-DTL-38999 Series III
240-383B SuperNine® Threaded Coupling

240-383B HIGH RELIABILITY FILTER CONNECTOR ADAPTER WITH THREADED COUPLING

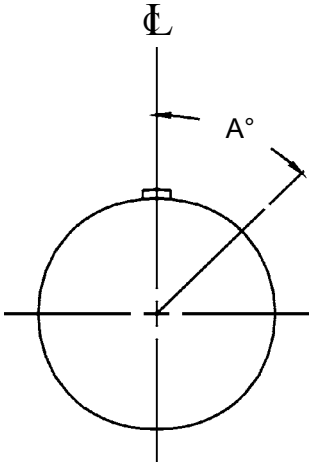
33	2.000-.1P-.2L-DS	2.000-.1P-.2L-DS	2.329 (59.16)

NOTES

1. Other filter styles (C-L, L-C, Unbalanced Pi, Multi-Stage, Multi-Value) are available, please consult the factory.
2. Please consult the factory for Pin/Pin and/or Socket/Socket contact arrangements.

Table I: Material and Finish		
Plating Code	**Material**	**Finish**
M	Aluminum	Electroless Nickel
B		Cad Plate, Olive Drab
NF		Cadmium Plate Olive Drab over Electroless Nickel
NC		Zinc-Cobalt
ZN		Olive Drab Zinc-Nickel
MT		Ni-PTFE 1000 Hour Grey™ (Nickel Flourocarbon Polymer)
ZR		Zinc NIckel, Black
ME		Electroless Nickel (RoHS)
ZL	Stainless Steel	Electro-Deposited Nickel



FACE VIEW
RECEPTACLE

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate positions are available.

In alternate positions, the pin insert rotates clockwise the same number of degrees relative to the center line of the master key or keyway. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

Table IV: Capacitor Array Code Capacitance Range for Filtered connectors		
Class	**Pi - Circuit (pF)**	**C - Circuit (pF)**
X*	160,000 - 240,000	80,000 - 120,000

BETTER THAN QPL

SuperNine®: The advanced-performance MIL-DTL-38999 Series III style connector

Better than QPL? SuperNine® is the interconnect industry's most complete and advanced D38999 Series III type connector family. From IP-68 rated environmental-class connectors with improved durability and ease-of-use, to EMI/EMP filter connectors with innovative flange and PC tail termination configurations, SuperNine® offers military and commercial aerospace customers that have standardized on Series III technology the opportunity to improve interconnect system performance and resolve a wide range of persistent electrical, environmental, and mechanical performance problems —all with catalog (COTS) connector solutions backed by Glenair's high-availability business model.

Better than QPL means significant innovation in every class of connector in the series. SuperNine® hermetics for example, offer many features not available in QPL hermetic solutions, such as crimp-removable socket contacts. Our fiber optic connector series is designed and built to tight-tolerances to ensure precise alignment of fiber optic termini, and superior optical performance.

SuperNine® offers improved durability, sealing, cost-of-ownership, ease of shield termination, a broader range of PC tail configurations, environmental and hermetic bulkhead feed-throughs, connector savers, off-the-shelf EMI/EMP filter connectors and more—all supported with Glenair's well-established reputation for service, support, and fast turnaround.

THE SUPERNINE® TECHNOLOGY PROMISE

- **Across-the-board improvements in mating-cycle and contact durability**
- **Advanced ease-of-use features such as integrated band porches and PC-Tail standoffs**
- **Advanced-performance improvements in every connector class—from filters to fiber optics**

Glenair SuperNine® connectors in action: in this example, a pair of our advanced fiber optic interconnects cabled-up in a turnkey, environmentally sealed point-to-point jumper

RECTANGULAR

SAV-CON®

Rectangular Connector Savers

Connector savers for D-subminiatures, HiPer-D™ Micro-D, Nano-Miniature™ and Micro-Crimp™

Glenair Sav-Con® Connector Savers—the smart way to prevent contact damage and protect connectors for mating and unmating wear. Now available for all of our rectangular connector lines:

- Series 28 HiPer-D® the M24308 compatible D-subminiature for standard and high density applications
- Micro-D and Nano-Miniature™ connectors with high performance TwistPin contacts
- And Series 79 Micro-Crimp™ our high density, low profile aerospace connector.

insulator	Thermoset epoxy
interfacial Seal	Fluorosilicone rubber
Hardware	300 series stainless steel

Specifications	
Current Rating	#22D 5 AMPS, #20 7.5 AMPS
Test Voltage	1000 VAC RMS
Insulation Resistance	5000 megohms minimum
Operating Temperature	-65° C. to +200° C.
Ingress Protection	IP 67
Shock	300 g.
Vibration, Random	43.92 g.
Magnetic Permeability	2 µ maximum
Outgassing[1]	Postcure required to meet ASTM E595 NASA requirement

Sav-Con® connector savers
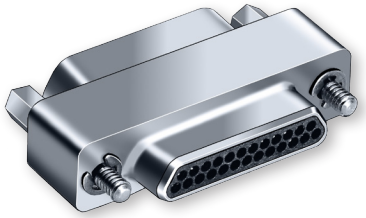
Micro-D connector saver
MWDM2L with TwistPin Contacts

Protect Expensive Equipment with Glenair Micro-D Savers



These connector savers feature a one-piece aluminum housing, TwistPin contacts and locking hardware. Typical applications include test equipment and space-grade instruments. The Micro-D Sav-Con® prevents wear and tear on sensitive gear. Standard versions are electroless nickel plated. Other plating finishes are available on request.

- Compact Size reduces stress on mating connectors.
- In Stock, No Waiting – All standard sizes are in stock (9, 15, 21, 25, 31, 37, 51 and 100 pin).
- EMI Protected one piece shell.

Sav-Con® connector savers
Micro-D filtered connector saver
240-033 In-Line Filter Adapter

EMI/RFI Filter Micro-D Connector Saver

Glenair Sav-Con®, inline filter adapter, provides EMI solutions in a miniaturized M83513 type connector. These connectors feature ceramic capacitor planar arrays and ferrite inductors. Solder cups accept #26 thru #30 AWG wire, or specify oversize contacts for #24 gage wire.

Choose PI or C Filter arrays in eighty filter classes and six layouts. Glenair filtered MIcro-D connectors comply with applicable MIL-DTL_83513 requirements and are 100% interamteable with standard connectors.

Choose 9 to 37 contacts, with standard cadmium or nickel plating on the connector housing or choose optional finishes such as gold or Chem Film.

How To Order

Sav-Con® connector savers

Series 79 Micro-Crimp® connector saver

799-070

Glenair Series 79 Connector Savers provide a low profile one-piece machined aluminum housing. Ground spring protects circuits from EMI problems. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel shell finish for avionics and space applications. Also available with cadmium for compatibility with cadmium or zinc plated connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.

MIL-DTL-38999 Series III
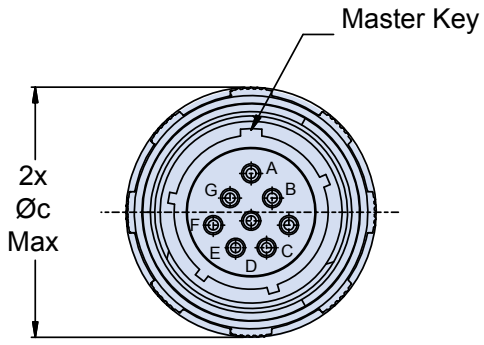
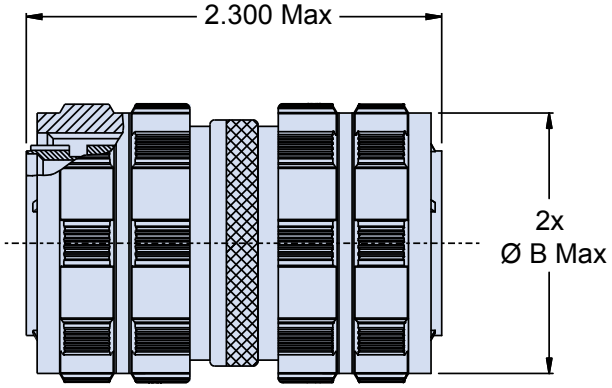
233-214 SuperNine® Plug/Plug In-Line Gender Changer

How To Order							
Sample Part Number	**233-214**	**-NF**	**17-8**	**P**	**N**	**S**	**N**

Series / Basic Part No.	**233-214**
Finish	**NF** = Cadmium Olive Drab **ME** = Electroless Nickel **MT** = Nickel PTFE **ZR** = Black Zinc Nickel
Shell Size - Insert Arrangement	See Table II
Contact Style (Plug Side)	**P** = Pin, gold, 500 cyles **S** = Socket, gold, 500 cycles
Alternate Polarization (Plug Side)	**A**, **B**, **C**, **D**, **E**, **N** = Normal, **U** = Universal; See Note 5
Contact Style (Opposite Plug Side)	**P** = Pin, gold, 500 cyles **S** = Socket, gold, 500 cycles
Alternate Polarization (Opposite Plug Side)	**A**, **B**, **C**, **D**, **E**, **N** = Normal, **U** = Universal; Review Note 5 See Table II





NOTES

1. Glenair 233-214 connector savers are designed to meet or exceed the mechanical dimensional, electrical, and environments, requirements of MIL-DTL-38999, D38999/20 and /24 and MIL-STD-1560 except as shown and /or noted. Glenair connector savers mate with any QPL manufacturer's MIL-DTL-38999, series III plugs and receptacles have the same shell size, insert arrangement, and polarization.
2. For pin/pin and socket/socket, symmetrical layout only.
3. Power to a given contact on one end will result in power to a contact directly opposite, regardless of identification letter.
4. Electrical safety limits must be established by user. Peak voltage, switching surge, transient, etc. should be used to determine the safety application.
5. Alternate polarization 'U' (universal) is a non-standard/non-mill-spec option intended for test lab use only which allows for mating to any QPL manufacturer's MIL-DTL-38999, series III connector having the same shell size, insert arrangement, and mating contact size. Universal connectors are intended for use in testing facilities only and should be highly evaluated before consideration in another environment.

HiPer-D® D-subminiature
289-057P, 289-058S Gender Changer

HiPer-D® Gender Changers provide a convenient way to change the gender of an interface to allow attachment of a mismatched cable. Two styles are available: male-male and female-female. Machined metal housing protects circuits from EMI problems. Available in standard density and high density contact arrangements. Intermateable with standard M24308-type connectors. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel or gold shell finish for avionics and space applications. Choose cadmium for compatibility with cadmium or zinc plated M24308 connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.
