

AS83519/1 AND /2 TYPE

# HEAT SHRINK TERMINATION (HST) SLEEVES

5 SIZES WITH AND WITHOUT WIRE LEADS

**R**eliable termination of EMI/RFI shielding (to ground) in wire harness applications is universally accomplished with AS83519/1 and /2 type heat shrink termination (HST) sleeves. These devices, supplied in five different sizes—with or without pre-installed ground lead wires—provide environmental encapsulation and insulation of the shield termination site. Transparent heat shrink tubing allows for easy inspection and supplies additional strength and strain-relief. The preflux solder preform delivers a fast and controlled solder joint each and every time. Best of all, these HST devices are made in the USA and stocked for immediate same-day shipment.
