

SERIES 77  
LIPLLESS HEAT  
SHRINK BOOTS

# LIPLLESS BOOTS

Environmental sealing and strain relief for direct attachment to connectors without boot adapter

Series 77 lipless heat shrink boots provide excellent protection from environmental debris while providing strain relief and withstanding harsh work environments where exposure to fuels, solvents and other fluids is likely. Lipless boots require no adapter, and adhere directly onto the threaded rear interface of connector providing a low profile solution. Shrink boots are available in 8 material types, including low smoke/zero halogen, low outgassing fluoropolymer, Viton®, and high performance elastomer. Boots are available pre-coated with or without adhesive.
