

European Union Directive Related to  
Registration, Evaluation and Authorization of Chemicals (REACH)

January 2012

REACH is primarily concerned with import to the EU of listed “substances” in amounts greater than one “tonne.” Glenair does not sell “substances.”

REACH also addresses “articles” to be imported into the EU. If such articles contain substances “intended to be released” in amounts greater than one “tonne” per year, that substance would need to be registered. This situation does not apply to Glenair products.

Finally, the lists of “substances of very high concern” published on October 28, 2008, January 13, 2010, March 30, 2010, June 18, 2010, December 15, 2010, June 20, 2011 and December 19, 2011 do not include any substances intentionally added or known to be contained at reportable levels in Glenair products.
