

Composites = Reduced Weight and Advanced Corrosion Protection

Composite Thermoplastic Connectors, Backshells, Junction Boxes, EMI Shielding, Convoluted Tubing, Fittings and More!

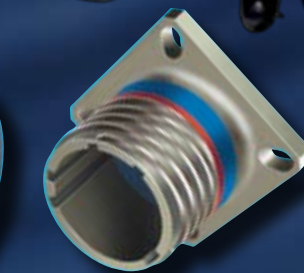

Nobody makes as many types and sizes of weight saving, corrosion-proof composite interconnect components as Glenair. Our parts are manufactured from high-grade engineering thermoplastics and have been qualified in test after test to the most rigorous military and industrial standards. Conductive versions are available for systems which require electromagnetic compatibility. Please see www.glenair.com/composite for complete information.

Composite EMI/RFI Junction Boxes

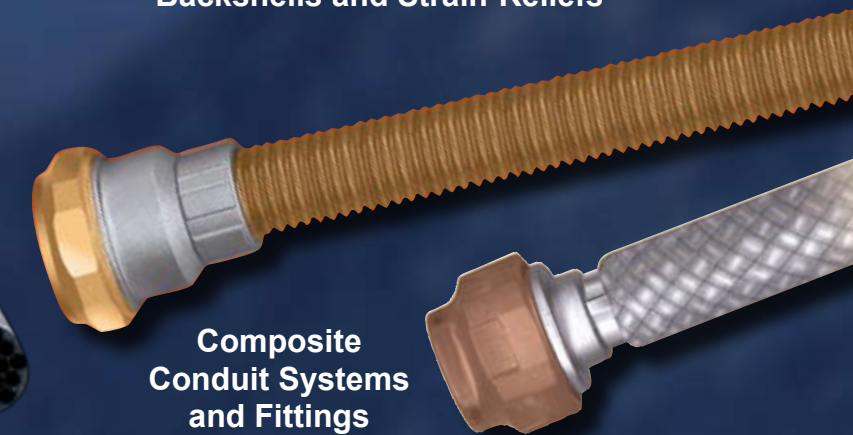

Ruggedized Composite Connectors

Light Weight Composite EMI/RFI Shielding

Composite EMI/RFI Backshells and Strain-Reliefs

Composite Conduit Systems and Fittings

Composite Swing-Arm Strain-Reliefs
