

User-Installable Fittings for Series 74 Helical Convoluted Tubing

PRODUCT FEATURES

- Wide Selection of Configurations
- Available in Standard Aluminum or Optional Brass, Stainless Steel or Composite Thermoplastic
- User-Installable—Accommodates Last-Minute Engineering Changes
- Quick Assembly Permits a Variety of Individually Specified Configurations
- Dimensional Tolerances:
.xx = $\pm .03$ (0.8mm) .xxx = $\pm .015$ (0.4mm)
- Build Your Own Repairable Conduit Assemblies—
The Perfect Solution for Prototype Applications and On-Site Assembly

Glenair Series 74 Helical Convoluted Tubing User-Installable Fittings, Adapters and Transistions

Threaded, user-installable fittings provide complete convenience for prototype applications and field assembly

Common user-installable fittings for the Series 74 Tubing are presented in this section. Glenair's series 74 User-Installable Fittings permit you to accomodate last-minute engineering changes, and to quickly assemble conduit systems in a variety of individually specified configurations and lengths as they are needed. Standard adapter material is aluminum. A selection of composite thermoplastic fittings are also available for additional weight savings and corrosion resistance. Consult factory for other materials including brass, stainless steel, and low-carbon steel.

Glenair offers hundreds of fitting design options not presented in this catalog. In fact, this catalog only presents a small fraction of the fitting types and styles commonly supplied by Glenair. Glenair is able to provide a wide range of additional designs including Grounded Swivel Fittings, Retractable End-Fittings and many types of Split-Shell Backshells. Please consult the factory for configurations not shown.
