*The minimum bend radius is based on Type A construction. For multiple-braided coverings,these minimum bend radii may be increased slightly.

## Packaging/Notes

- Long-length orders of 121-103 braided and jacketed conduit are subject to carrier weight and box size restrictions. For example, UPS air shipments are currently limited to 50 lbs . per box. Unless otherwise specified, Glenair standard practice is to ship optimal lengths of product based on weight, size, and individual carrier specifications. Consult factory for additional information or to specify packaging requirements.
- Consult factory for thin-wall, close convolution combination and for PEEK ${ }^{T M}$ and PTFE min/ max dimensions.
