

SERIES 77
Shrink Boot Adapters
Product Selection Guide

Metal Shrink Boot Adapters

Glenair manufactures several series of rugged aluminum, shrink boot adapters for shielded or unshielded cable.

G-2

Series 310
 Shrink boot adapters for unshielded cables. Available with rotatable or direct coupling

G-8

Series 311
 Lamp-base thread shrink boot adapters provide easy termination of EMI/RFI shielding. Braided shielding is captivated under threaded nut.

G-12

Series 319
 Shield sock shrink boot adapters are available with rotatable or self-locking coupling nut and factory-crimped and tinned copper braid.

G-14

Series 440
 Shrink boot adapters for shielded cable provide a banding platform for the attachment of cable braid using BAND-IT® bands.

G-18

MIL-SPEC Adapters
 Straight shrink boot adapters are available for all types of cylindrical connectors.

G-20

Series 63
 Bulkhead feed-through fittings

G-26

Composite Thermoplastic Shrink Boot Adapters

Glenair manufactures several series of lightweight, corrosion-resistant composite shrink boot adapters for shielded or unshielded cable.

G-258

Series 310
 Shrink boot adapters for unshielded cables. Available with rotatable or direct coupling

G-30

Series 380
 Shrink boot adapters for shielded cables. Rotatable coupling

G-32

Series 440
 Ultra low profile EMI/RFI adapters. Available with self locking, rotatable coupling nut, banding porch and boot groove

G-33

Series 447
 Ultra low profile EMI/RFI shrink boot adapter. Available with self locking, rotatable coupling nut, banding porch and boot groove

G-35

For a complete line-up of metal shrink boot adapters see the Circular Connector Adapters and Accessories Catalog or for composite adapters see the Composite Thermoplastic Adapters and Accessories Catalog.
