Special Hermetic Connectors

Sometimes a standard part just won't do. For these situations Glenair welcomes your custom requirements. Whatever the need, we can propose a solution and back it up with rapid design and prototyping. Glenair special hermetic connectors are made from the same passivated stainless steel or ferrous steel shells, with glass insulators fused to the connector shell, and contacts meeting a leak rate of 1 X 10-7 cc/Helium per second. Innovative designs to meet every need are available from Glenair and, as always, **no minimums** are required.

Quick Selection Guide		
Part Number	Description	Page
237-263	Special Micro Circular Quick Disconnect Receptacle, Rear Panel Jam Nut Mount	N-2
2570-1290	Hermetic Single–Pin Feedthrough - Hi Temp, Hi Pressure	N-4
