AEROSPACE-GRADE FOR QPL MIL-DTL-83513 AND GLENAIR SIGNATURE MICRO-D CONNECTORS

Backshells

M83513 Micro-D connector backshells and accessories—the world's most complete selection, all with available same-day delivery

The MIL-DTL-83513 is the go-to connector for high-performance commercial and military aerospace applications. From satellites to miniaturized avionic equipment, the Micro-D is recognized worldwide for its high-reliability, life-of-system durability, and SWaP. Glenair manufactures and supplies both the connectors as well as the complete range of EMI, environmental, and mechanical strain relief backshells required in the construction of high-reliability wire harnesses and cable assemblies. All our Micro-D connectors and backshells are manufactured in our US and UK facilities and are uniquely supplied with industry-leading availability, up to and including same-day shipment.

Glenair Signature Series M83513 Backshells

Lightweight thin-wall construction Series 507 backshells

Solid-body strain relief backshell with Qwik-Ty cable attachment
