SPEEDMASTER™

High-speed 10G Ethernet connection system for Glenair Series 79 connectors

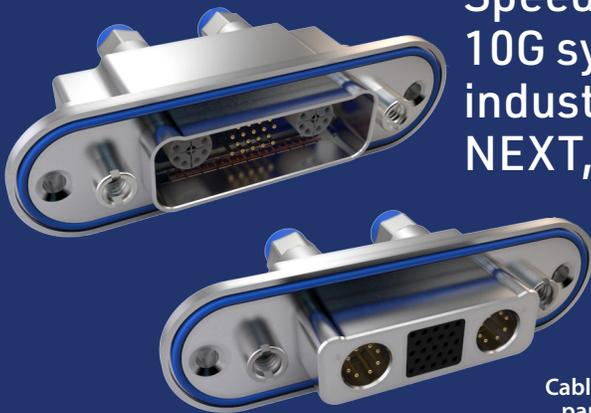

SpeedMaster advanced-performance Series 7925 rectangular connectors

SpeedMaster™ is a dedicated size #22D crimp-contact module and insert package for Series 79 connectors. Optimized for high-speed Cat 6A Ethernet, the

SpeedMaster™ 10G system offers industry-leading NEXT, return loss, and insertion loss performance

- Utilizes aerospace industry standard SpeedMaster #22D contacts, tools, and widely available Ethernet flight cable
- Significant weight reduction compared to Quadrax solutions (reduces cable requirement by half)
- Series 7925 connector package is scoop-proof with a dual-lobe shell, offering environmental sealing and EMI/RFI shielding

Cable-mount and sealed panel-mount designs
