**NOTES**

- Material/Finish:
  - Shell, Jam Nut - See Table I
  - Contacts - Copper Alloy / See Table III
  - Insulators - High Grade Rigid Dielectric.
  - Seals - Fluorosilicone Blend.
  - Potting - Epoxy.
- Glenair's 234-206 receptacle connector is designed to meet the applicable performance and interface requirements of MIL-DTL-38999 Series IV except as shown and/or noted. Receptacle mates with any QPL manufacturer's MIL-DTL-38999, Series IV plug having complimentary features (shell size, insert arrangement, polarization, and contact gender).
- Glenair's 234-206 connectors are designed to withstand a minimum of 1500 mating durability cycles when mated to a "super nine" mating connector and appropriate contacts applicable to all signal contact layouts only. High speed contacts are not intended for extended durability. Finish should be the same for both mating connectors to optimize performance..
- Insert arrangement is in accordance with MIL-STD-1560. Arrangement shown for reference only.
- Connector is supplied with contacts (including spares), insertion/removal tool, and sealing plugs where indicated in Table III.
